

**Patient Responsibility-Insurance Disclaimer-Regional Medical Oncology Center**

Insurance Disclaimer: "A quote of benefits and/or authorization does not guarantee payment or verify eligibility. Payment of benefits are subject to all terms, conditions, limitations, and exclusions of the member's contract at time of service."

In compliance with insurance guidelines, Regional Medical Oncology Center will obtain authorization/precertification prior to administering any treatment from the insurance company you provided at registration. Without these precertification's, your insurance will deny paying for your treatment and you may be responsible for covering the cost out of pocket.

Oftentimes, the opportunity to change insurance plans will come mid-enrollment. When this happens, the authorization/precertification process must begin over from the start and often the case will be that the new plan will not cover the treatment you have begun. This causes delays in your treatment or in some cases discontinuation of treatment.

In some cases, a patient may have no choice but to change plans. For instance, change/loss of job, qualifying for Medicare or Medicaid, or annual enrollment will cause a change and the sooner a patient provides this information, the better we are able to help them.

**Our request to you is that you do not change your insurance plan mid-treatment unless one of the above or similar circumstances unfortunately happen.**

Please know that Regional Medical Oncology Center is doing everything on your behalf to make your treatment as smooth a process as possible and by signing below you confirm that you have read the above request and will, to the best of your ability, comply.
